

Postgraduate Certificate Web Design and Development

User-Centred Design on the Web

Peter Otto & Martina Schell

Introduction

web design & development

Discuss: What is design?

good

Discuss: What is design?

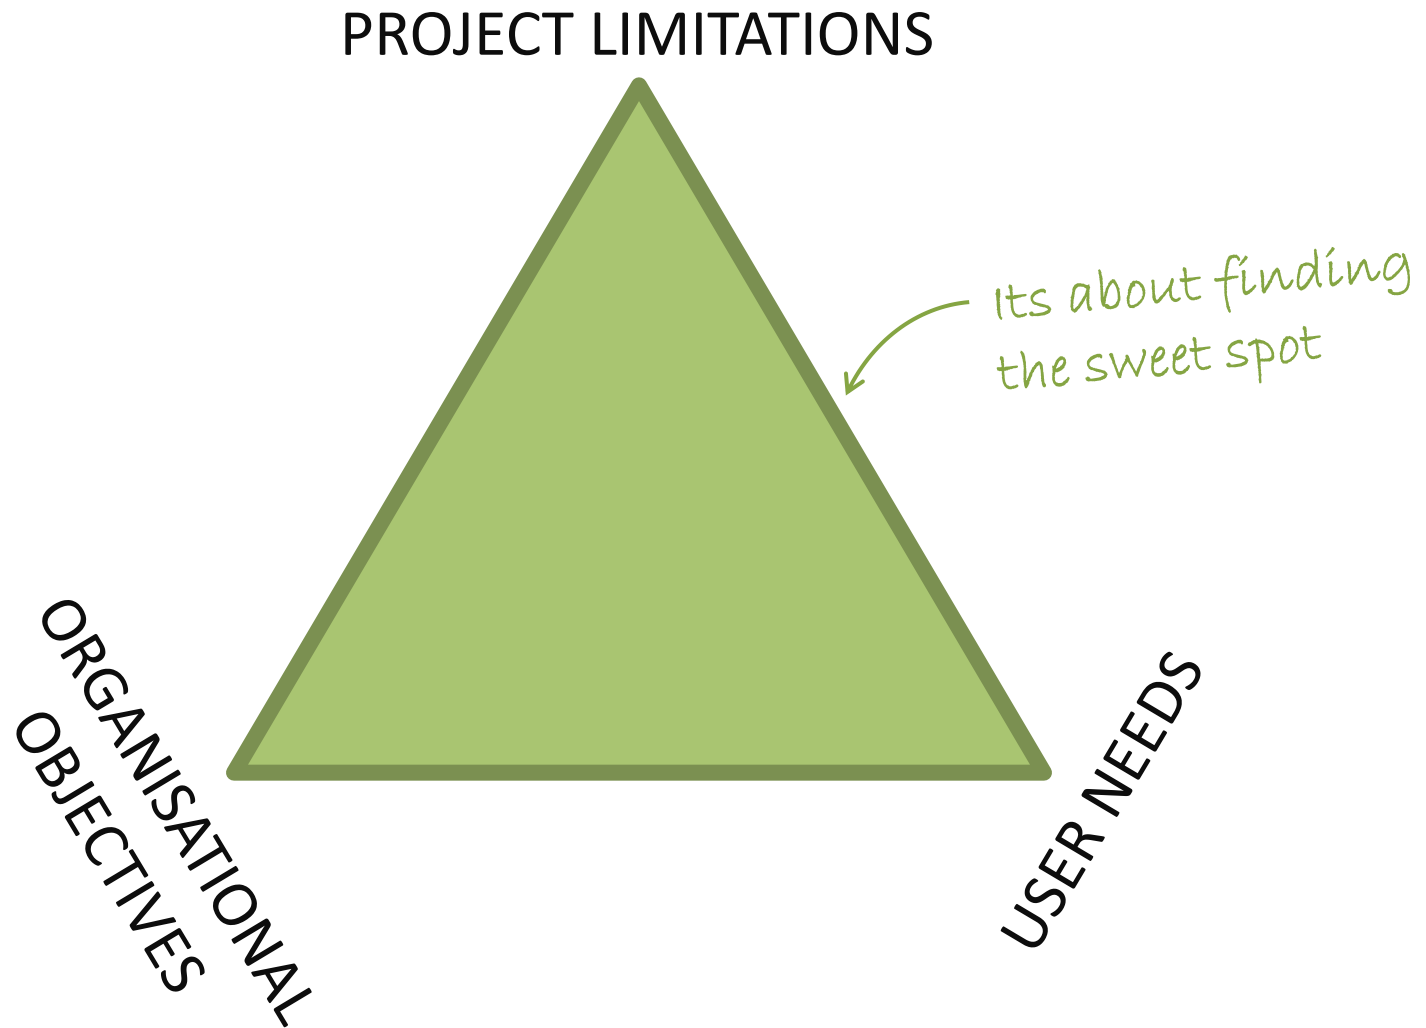

...think of some everyday examples of good design...

Why Michael can't have his breakfast...

So, why can't Michael have his breakfast?

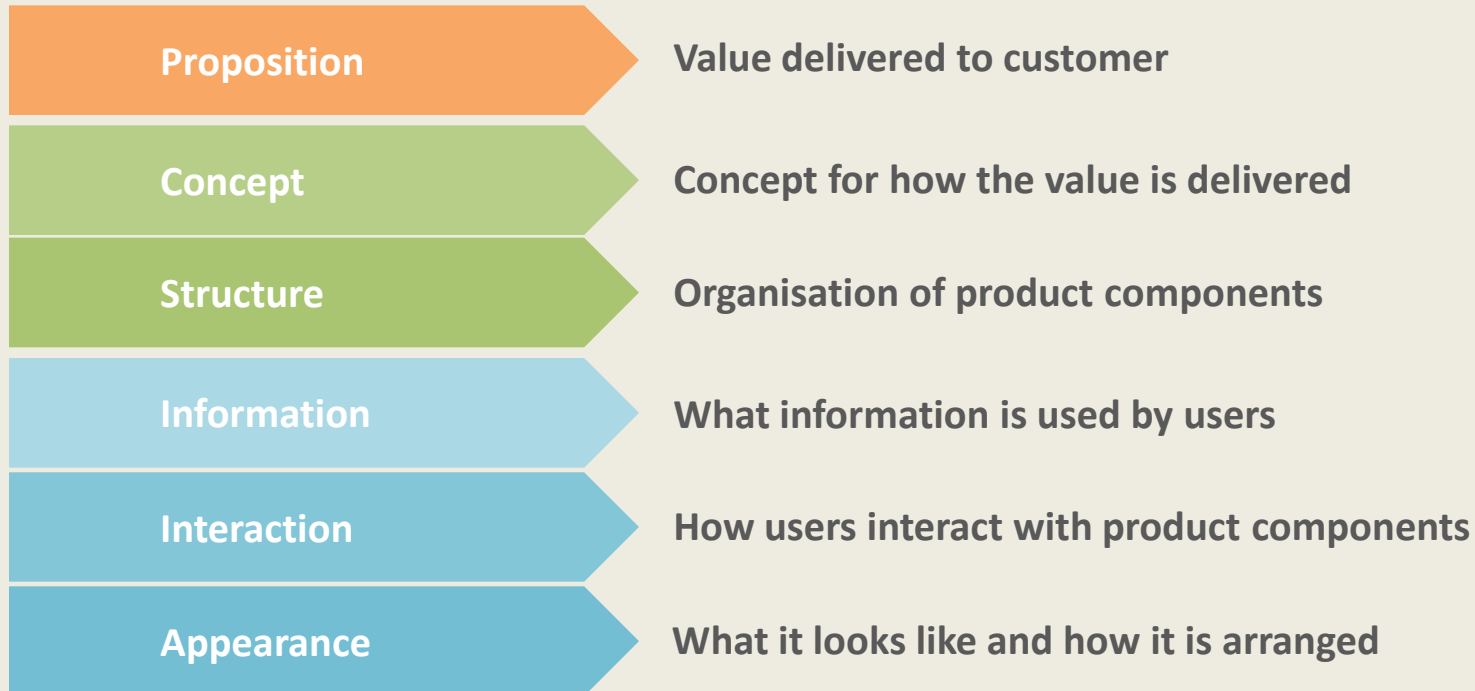

This module

- In this module we teach **how to create websites that are well designed**.
- **WDD 2.1** was about **scoping and managing** your project
- Today in **WDD 2.2** we look at how to understand **user and business needs**
- In **WDD 2.3** we'll look at how to translate those into a **design**
- In **WDD 2.4** we'll look at how you can **test your design** to understand if it works

What is User Experience?

Elements of user experience

...one view of it. [Here's another one](#)

Task: Review a website

- Look at <http://www.orange.co.uk>
- What is the website's **proposition**? How relevant is it?
- What is the underlying **concept** that realises the proposition? Does the concept work?
- How is the website **structured**? Is this effective?
- What **information** is on the website? Is it sufficient and relevant?
- How does the **interaction** work? What is problematic and what is well executed?
- How does the website's **appearance** reflect its proposition, concept and brand?

What is ^{a good} User Experience?

A good user experience is...

**How do you create a good
user experience?**

How do you create a good users experience?

...by involving
these people
throughout...

...this process is called user-centred design.

PROJECT TIMELINE

A horizontal timeline arrow pointing right, labeled 'PROJECT TIMELINE'. Below the arrow, four rounded rectangular boxes represent the stages of a project: 'DISCOVERY & RESEARCH', 'DESIGN & CONTENT CREATION', 'EVALUATION', and 'BUILD'. The 'EVALUATION' box is positioned above the 'DESIGN & CONTENT CREATION' box. Small circles are placed at the start and end of the timeline.

User-centred design

- User-centred design (UCD) is a design process that is based on **around structured user involvement** and **iterative design**
- There are many possible UCD models, **but all follow the same sort of pattern**
- There is also an **International Standard** for user-centred design, [ISO 13407](#), which can be used to inform many Web development projects.
- **It's a toolbox:** pick and mix
- Fit for purpose – **we do not have to use every tool!**

A recap on terms...

Terms

- **User Experience** is the overall experience and satisfaction a user has when using a product or system
- **User-Centred Design** is a process of how to design by continuously involving users.
- But from the users' perspective, their user experience is built on the **interactions** they have with the website.
- **Individual user interactions are the building blocks of the overall User Experience**
